Standard Methodologies: TV and Digital Ad Testing

Modalities

- Galvanic Skin Response (GSR)
- Electroencephalography (EEG)
- Eye Tracking (ET)
- Facial Expression Analysis (FEA)
- Self Report

Sample Specs

N = 30 per cell

Up to 3 videos per person; up to 9 masking videos

Gen pop or targeted recruit

100% right-handed (for EEG)

Gender split based on target demographics

Methodology

Setup & Calibration

Participants wear an EEG cap and wrist-based GSR device, while seated in front of a monitor to capture eye tracking and facial expressions

Target Content Presentation

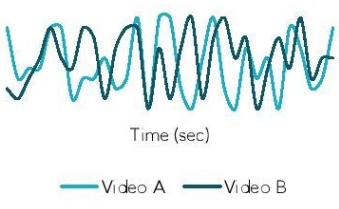

Consumers view target videos either in the context of a clutter reel, with masking videos between targets, or as part of a longer experience (e.g., full hour of TV)

Survey

Participants are given a brief self-report questionnaire about their experience (video recall, likeability, etc.)

Key Deliverables

Time-course Emotional Response

Visual Attention Heat Maps

Percent Time of Facial Expressions
