Accessing RDC Study Data

This article provides instructions for monitoring data collection, accessing study data from my.imotions.com and importing it into iMotions Lab software.

Monitoring Data Collection from my.motions.com

1. Log in to my.imotions.com and click on the study.
2. Respondent information can be found on the *Overview* page in the *Respondents* section and on the *Data Collection* page.
    a. Id - iMotions respondent ID
    b. Respondent, Study, and Machine - user-defined fields, only in iMotions Lab Management
    c. Started - Date and time the respondent began the study - by opening the study link
    d. Ended - Date and time the respondent ended the study - by finishing study data upload
    e. Eye tracking - Precision (degrees visual angle) and Percentage of recording with eye tracking data
    f. Est. face % - Percentage of recording with face data
    g. Block - Study flow name
    h. Status
        i. In Progress - Respondent has opened the study link
        ii. Processing - Respondent has completed the study and file upload
        iii. Processed - Respondent files have been processed. Data are available for download.
        iv. Abandoned - Respondent file upload was interrupted. This occurs if the study/browser window is closed or loses internet connection is lost during the upload.
        v. Errors - Respondent files contain errors and can not be processed. This occurs if data files contain errors or are invalid file types.

Manually Uploading Respondent Data Files to my.imotions.com

For RDC studies using the *Data upload alternative* option, respondents will be able to download their data files (zip file) and send them to the specified email address (in study settings on my.imotions.com). The downloaded file can be uploaded manually on your study page on my.imotions.com.

1. Log in to my.imotions.com and select the study and respondent that requires manual upload. This is indicated by the Respondent Status: *manual zip.*

2. Click on *Upload respondent zip file* and select the respondent data file.

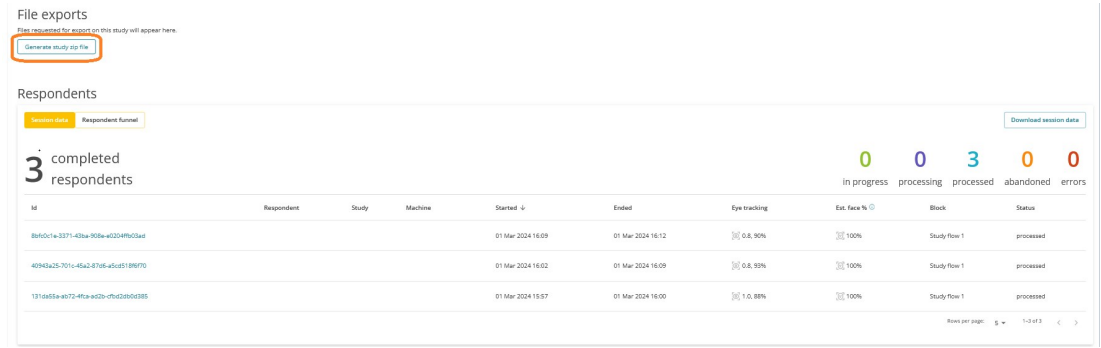

3. Once the upload is complete, the data will begin processing.

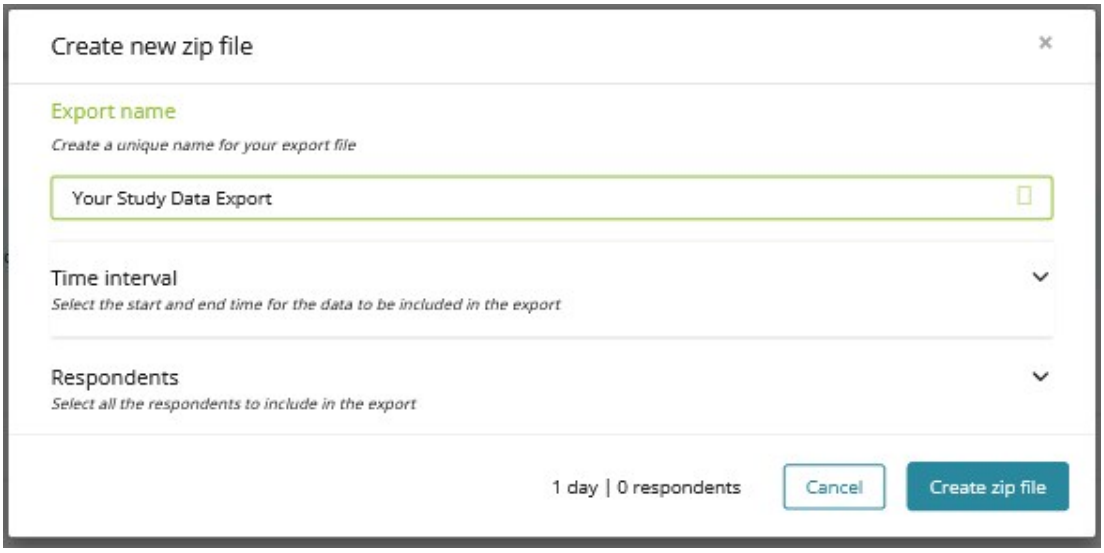

Downloading RDC Study Data from my.imotions.com

1. Log in to my.imotions.com and click on the study.
2. Scroll down to the *File exports* section of the study page and click *Generate study zip file*.
3. Use the *Create new zip file* interface to define the *Export name* (zip file name)
4. (Optional) Select the *Time interval* and *Respondents* to include in the exported file.
5. Click *Create zip file*, which will add the file to the list of File exports with the Status: Processing (Note: This process may take a few minutes or longer, depending on the amount of data being exported).
6. Once the zip file is created, the file status will update to Download - click

to begin downloading the zip file with your RDC study data.

Importing RDC Study Data into iMotions Lab

1. From the top left of the main iMotions window, click *File>Load Study from File*.
2. Select the zip file downloaded from my.imotions.com
3. Study data can be imported as a new study or merged with existing data for a given study.
