Camera Setup (Audio & Video Settings)

Audio & Video iMotions settings are used to connect cameras and other audio/video inputs.

iMotions Camera Types

In iMotions, up to three camera (or audio-video inputs) can be recorded during data collection. These recordings will be synchronized, saved, and displayed in Sensor Preview and Replay Windows.

Other audio/video inputs can be selected - including frame grabbers, video passthrough software, and microphones.

Each camera input has built-in functions.

- Respondent Camera
    - Intended for recording the respondent's face.
    - Facial Expression Analysis (AFFDEX, FACET) and Voice Analysis (AudEERING, AssemblyAI) is only available for recordings from the Respondent Camera, which must be used for these analyses/data.
- Scene Camera
    - Intended for recording stimuli. The Scene Camera recording functions as stimulus recording in iMotions.
    - Eye Tracking data can be mapped on to the Scene Camera recording, as with Eye Tracking Glasses, Smart Eye Pro scenes, Advanced Screen-based Eye Tracker setups (e.g. Phones/Mobile Devices).
- Environment Camera
    - Intended for recording additional video of the study environment. This video will be synchronized with your recordings but does not apply any other processing.
    - The Environment Camera is available as an 'extra' recording in any study for any purpose.

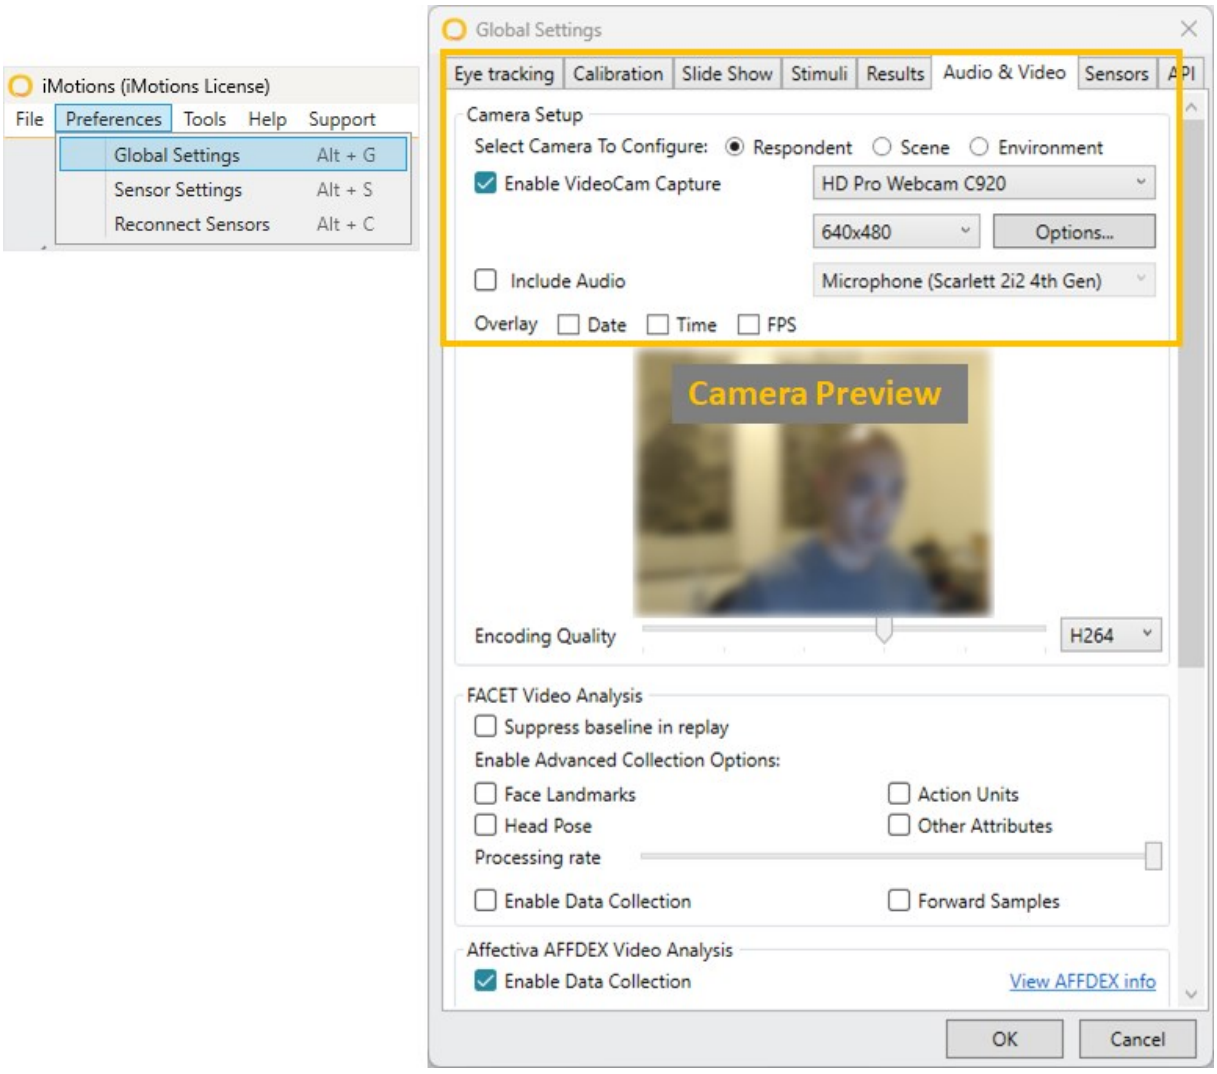

iMotions Audio & Video Settings

Each Camera can be selected and configured in your iMotions Global Settings (Audio & Video tab).

General Camera Setup

1. Open iMotions Global Settings
2. Select the 'Audio & Video' tab
3. Select a camera in the 'Camera Setup' section
4. Check 'Enable VideoCam Capture' to record from the camera
5. Select a camera or other input (i.e. 'HD Pro Webcam C920')
6. Check 'Include Audio' to record audio from the selected camera
7. Video resolution, frame rate, and Overlay options, Encoding Quality, and video file type can be adjusted here

Enabling cameras in iMotions Global Settings (Audio & Video tab)

Facial Expression Analysis Settings

Confidential © 2023 Redistribution is not permitted without written permission from iMotions

Facial Expression Analysis can be enabled for the Respondent Camera only. You can enable Affectiva AFFDEX Video Analysis and/or FACET Video Analysis in your iMotions Global Settings (Audio & Video tab).

1. Check 'Enable Data Collect' in Audio & Video settings - 'Video Analysis' section
2. Adjust optional settings as needed.
3. Click 'OK' to save settings.
4. Facial Expression Analysis signals will now be available in iMotions Sensor Widgets, Sensor Preview, and Replays.

Voice Analysis Settings

audEERING Voice Analysis can be enabled in your iMotions Global Settings (Audio & Video tab) for Respondent Camera recordings only.

1. Check 'Enabled Modules' in Audio & Video settings - 'audEERING Voice Analysis' section
2. Adjust optional settings as needed.
3. Click 'OK' to save settings.
4. Voice Analysis requires post-processing to be added to your data and Replays.

Speech-to-Text Settings

AssemblyAI Speech to Text Audio Analysis in your iMotions Global Settings (Audio & Video tab) for Respondent Camera recordings only.

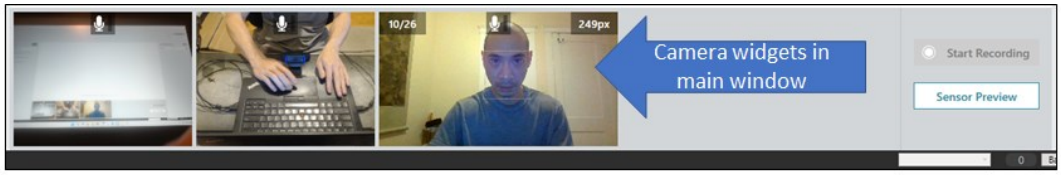

1. Enter the API key in Audio & Video settings - 'AssemblyAI Speech to Text Audio Analysis' section (Note: API keys are provided with module subscription)
2. Click 'OK' to save settings.
3. Restart iMotions to enable speech-to-text feature
4. Speech-to-Text requires post-processing to be added to your data and Replays.

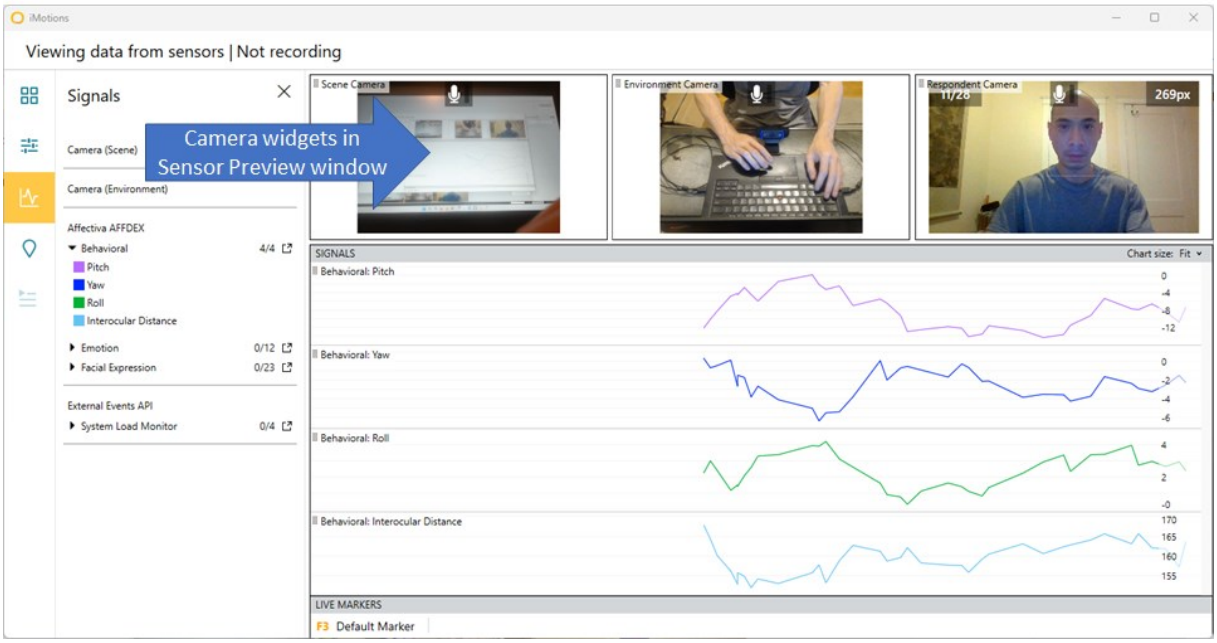

Camera Widgets and Panels

Camera videos are displayed in the Sensor Preview and Replay windows, according to your settings.

Confidential © 2023 Redistribution is not permitted without written permission from iMotions

- In the Sensor Preview, the 'Interface options' menu is used to open a panel or window with your camera previews.
- In Replay windows, the 'Panels' drop-down menu allows you to display/hide panels for your cameras.
- The example screenshots have all three cameras enabled - with the Scene, Environment, and Respondent Camera video/perspective shown (from left to right)
