Export: Respondent, Environment, and Scene Camera/Screen Recordings

This help center article explains how to export the video and audio recordings from the respondent, environment, and scene camera recordings; in the case of a screen recording, this video-recording is exported through the scene camera export.

What is the respondent, environment, and scene camera export about?

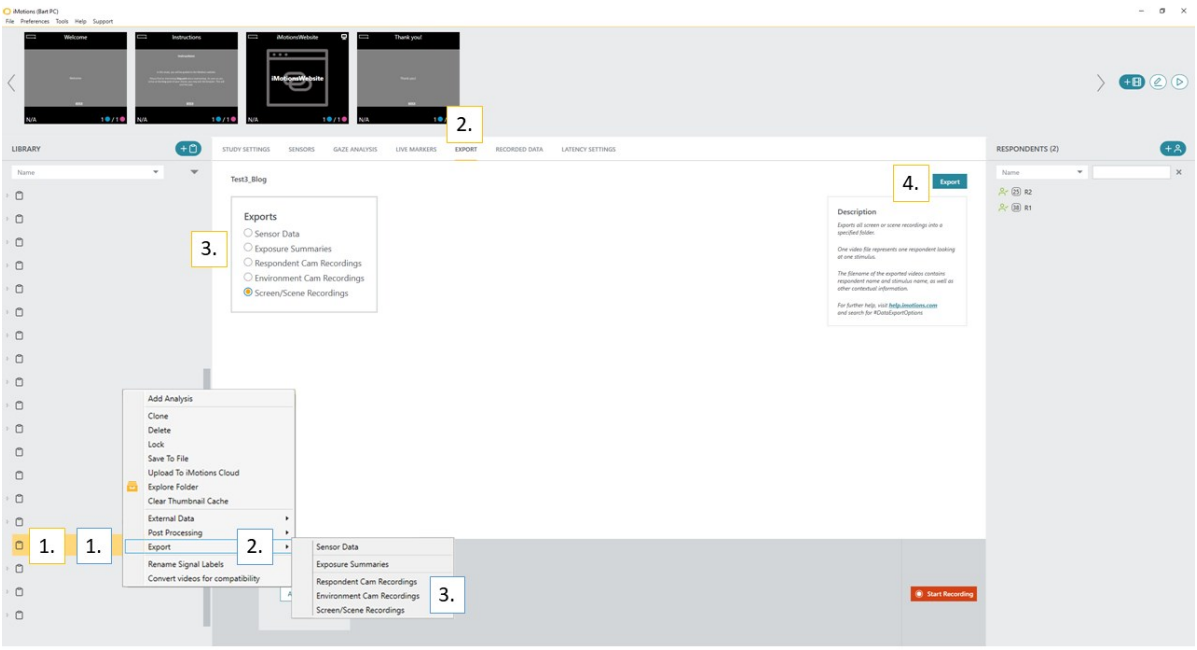

It is possible to export the video recordings made during a data collection. This includes the video recordings from *respondent*, *environment* and *scene* cameras, but also *screen recordings*, as these are captured through the scene camera functionality. Depending on how the video-recordings were recorded, these video-recordings are either exported as .wmv or .mp4.

Audio files can also be exported as separate files from an iMotions study. The audio can be exported separately from the *respondent*, *environment*, or *screen / scene* recordings, and are exported as .wmv files.

How to export videos?

The video recordings are available immediately after a recording has ended, and are exported from the page 'Export' (at the study level, not the analysis level).

In order to do that (yellow path)

1. Click the name of the study in the Library
2. Navigate to the tab ‘Export’
3. Select ‘Respondent Cam Recordings’, ‘Environment Cam Recordings ’, or ‘Screen/Scene Recordings’
4. Click the blue ‘Export’ button in the top-right corner, and choose the desired folder for saving.

Alternatively (blue path)

1. Right-click the name of the study in the Library
2. Choose ‘Export’
3. Choose ‘Respondent Cam Recordings’, ‘Environment Cam Recordings ’, or ‘Screen/Scene Recordings’, and navigate to the desired folder.

If you now explore the folder, you should find a separate video-file for every slide (i.e., stimulus) and respondent in the experiment.

How to export audio?

To export the audio file(s):

1. Right-click the relevant study in the study overview screen.
2. Mouse-over "Export", then "Audio".
3. Select the camera of interest from which to export the audio.
