Getting Started with Remote Data Collection (RDC)

This article provides an overview for first-time use of Remote Data Collection on my.imotions.com - alongside dedicated articles for:

1. Creating RDC Studies
2. Participating in RDC Studies
3. Accessing RDC Study Data

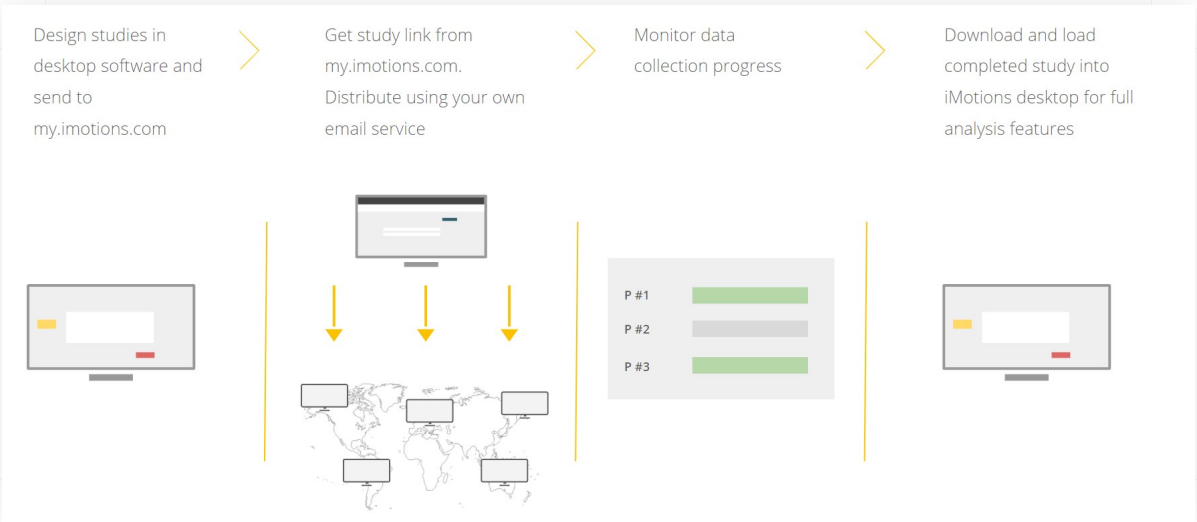

Overview of iMotions Remote Data Collection (RDC)

iMotions Remote Data Collection (or RDC) allows remote, remote data collection from any computer with internet access to my.imotions.com.

This involves creating a RDC Study in iMotions Lab software then uploading it to my.imotions.com, which provides a website link for study participation.

Respondents can then use the link and the internet browser on their computer to participate in the study. Their data will be uploaded to my.imotions.com at the end of their participation.

Collected data can be downloaded from my.imotions.com then imported into iMotions Lab for analysis.

Distinction from iMotions Online

To clarify between iMotions Remote Data Collection (formerly called *remote data collection* or *RDC*) and iMotions Online:

- iMotions Remote Data Collection and iMotions Online both allow webcam eye tracking, facial expression analysis, and screen recordings.
- Remote Data Collection is integrated with iMotions Lab software for analysis.
- iMotions Online provides a completely, browser-based solution for study setup, data collection, and analysis.

Remote Data Collection is the browser-based platform that requires the iMotions Lab software for study setup and analysis and requires subscription to the iMotions Lab and RDC modules.

iMotions Online is the standalone, browser-based platform (released in 2023). This can be used from any internet browser and does not require any other software or modules - just your subscription to iMotions Online.

Remote Data Collection study requirements and recommendations

Researcher requirements:

- iMotions Lab on computer with internet access (for study setup and data analysis)
- Access to my.imotions.com (for study setup, study link, and accessing collected data)
- Acceptance of Data Processing Agreement (DPA)
- Method for distributing iMotions RDC study link

Participant requirements:

- Participation in a RDC study requires a desktop or laptop computer with internet access and a supported browser.
- Participation can not be done on phones or tablets.
- Participation must be done on supported browsers: *Chrome*, *Firefox*, *Edge, or Safari* (*Internet Explorer* is not supported).
- Before participating, we recommend respondents update their internet browser to the latest version.

Confidential © 2023 Redistribution is not permitted without written permission from iMotions

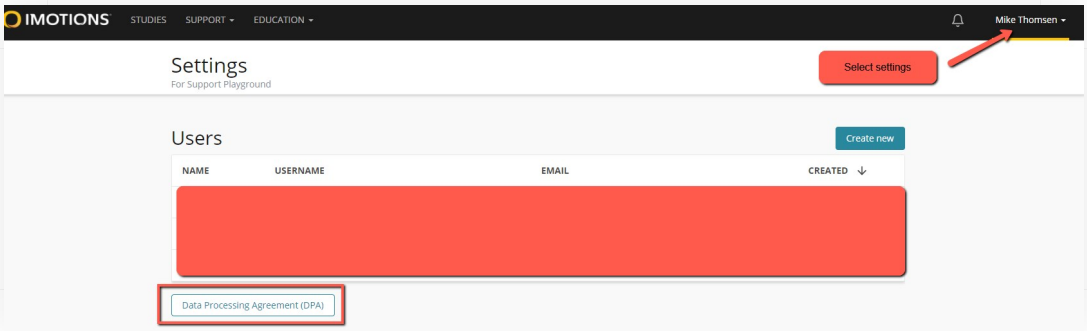

- Participation with unsupported and non-updated browsers may interfere with the study and result in unusable data files.
- Participation must be done on support operating systems: *Windows 10*, *Apple OSX*, *Chrome OS*
- Participant cameras must provide compatible video file formats: *mp4* or *wmv* (*webm* format is not supported)

Data Processing Agreement (DPA)

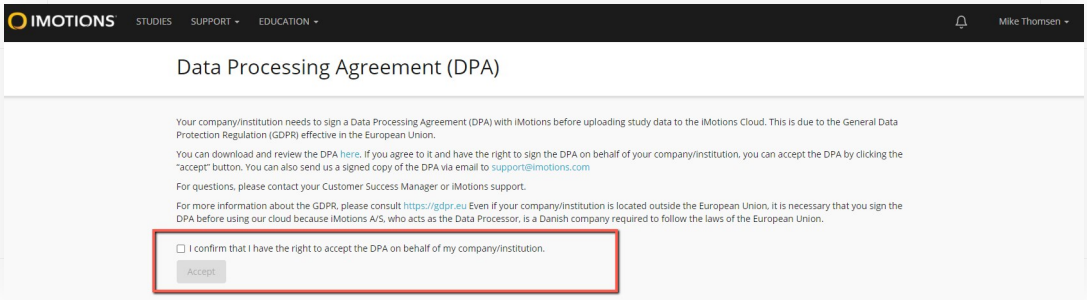

Users on the EU iMotions RDC server must read and accept the Data Processing Agreement before using iMotions RDC on my.imotions.com.

To read and accept the DPA:

1. Log in to my.imotions.com account
2. Go to your *Settings>Users* page (only available to iMotions account administrator)

3. Click *Data Processing Agreement (DPA)* to open the agreement
4. Read and, if agreed, check the box to confirm and click *Accept*

5. Upon accepting the DPA, you'll see the page a confirmation page

6. Confirm access to iMotions RDC by uploading a study
