RDC Testing with iMotions Survey

Survey stimuli can be added any RDC study. Please note that previously desktop survey templates, may render differently when added as a RDC Survey. Compared to a desktop Survey stimuli, RDC Survey stimuli have fewer options for survey elements. In a Web Survey Slide, you can only add the following elements to a study:

- Plain Text Message

- Scale

- Vertical selection

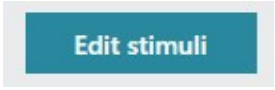

- Single/Multiple Choice

- Text input element (iMotions 9.0.12 and later)

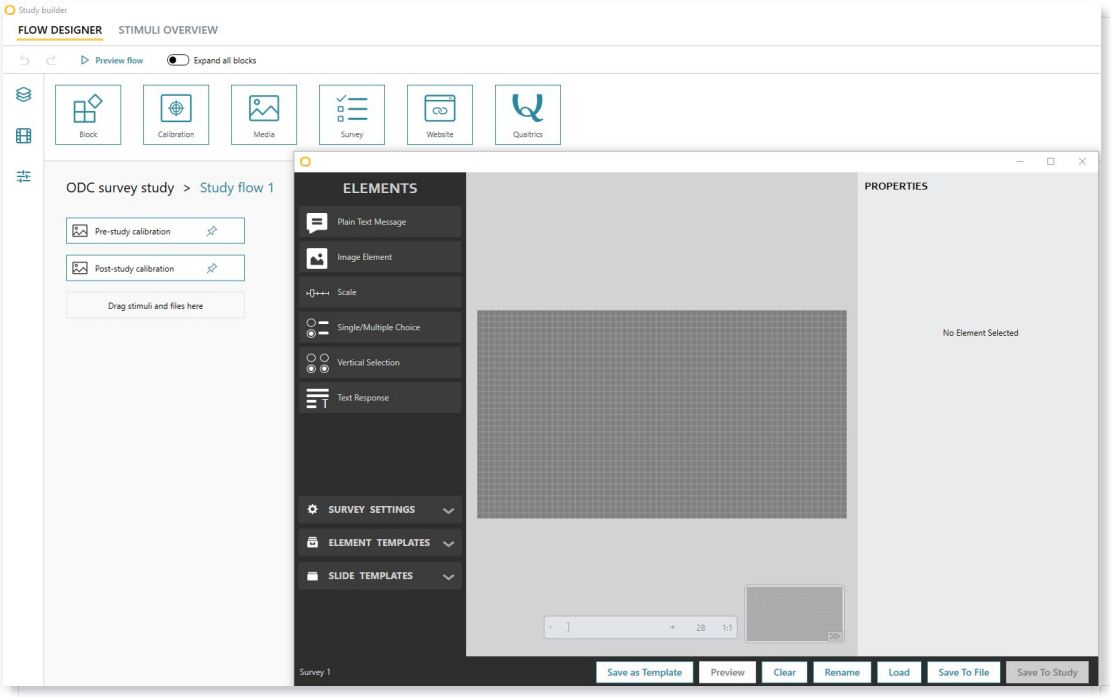

- Image element (iMotions 9.1.1 and later)

Adding Survey stimuli to an RDC study

1. Click the "Edit stimuli" button to begin adding stimuli to the study

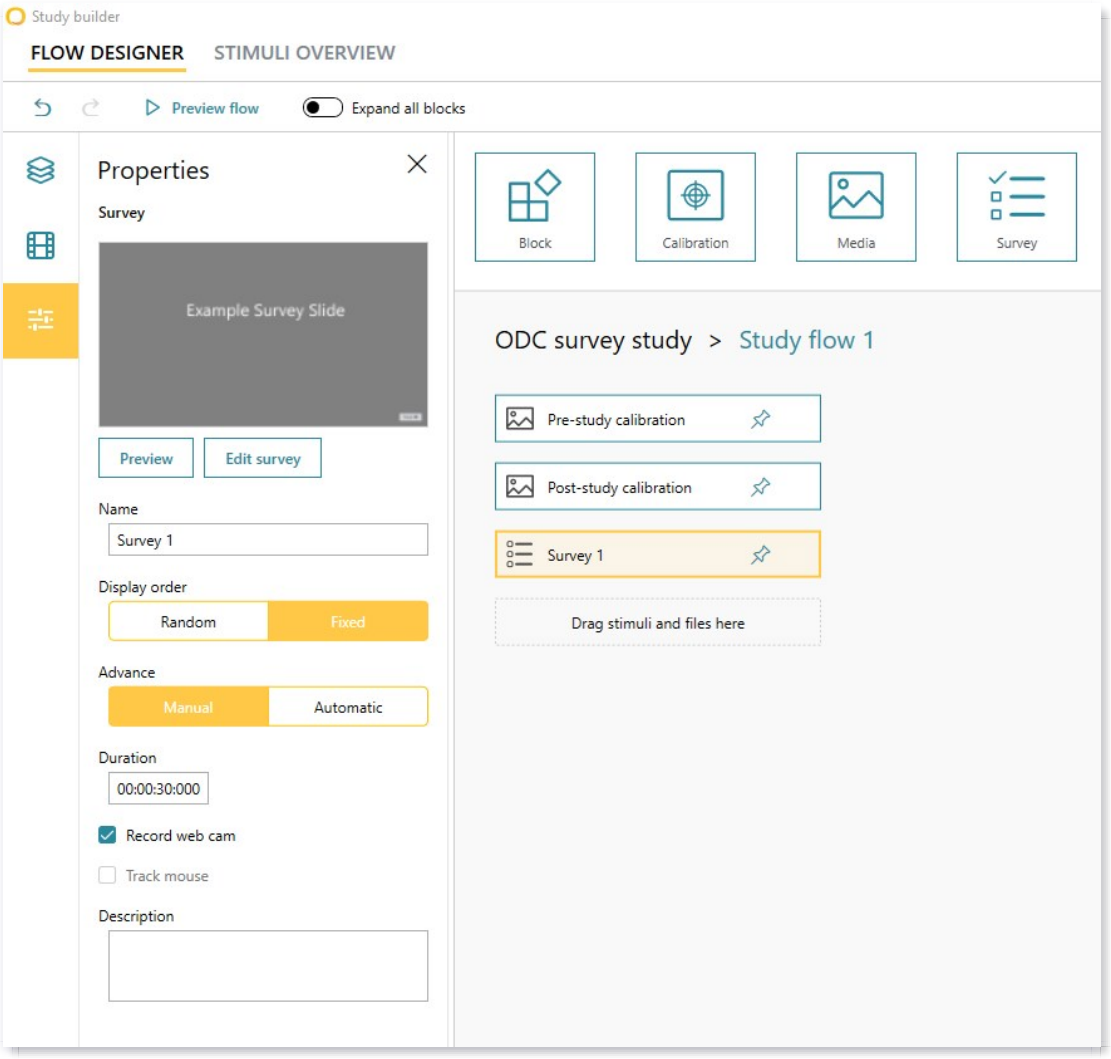

2. Click "Survey" to bring up the Survey editor

Confidential © 2023 Redistribution is not permitted without written permission from iMotions

3. Survey stimuli can be previewed and edited from the Study builder interface

Once the RDC study has been downloaded to the desktop you can export the survey results using the survey data export option.
