Survey Builder - Survey Elements and Settings

Editing Survey Elements

Confidential © 2023 Redistribution is not permitted without written permission from iMotions

can be edited in the central panel and the Settings panel (that appears on the right).

Note: Editing options and Settings will depend on the survey question type.

1. Add or Select a survey elements to edit.
2. Adjust the Order of your survey as needed.
3. Use the central panel to adjust Question Type or other available settings, e.g. question text.
4. Use the Settings panel for additional editing options, including Question/Input Type.

Survey Elements (Input/Response Types)

- Multiple Choice - Respondents select one response from list of available options (radio buttons).
- Checkbox - Respondents select any number of checkboxes from available options.
- Rating Scale - Respondents select one rating from a range of scalar values (ordered buttons).
- Image Picker - Select an image to display to respondents in place of a question (no input/response)
- Ranking - Respondents indicate their order of preference for response options by dragging and dropping options from a list.
- Slider - Respondents drag a slider on a number line to indicate their response.
- Dropdown - Respondents select one response from a drop-down list (similar to multiple choice response but occupies less screen space with the drop-down interface).

Text Input Types:

- Long Text - Respondents can enter multiple lines of typed input - compared to a single line for other text respon input text.
- Single-Line Input - Respondents enter a single response field. Responses be formatted for specific inputs, such as numbers, date, time, email, URLs, and other options.
- Multiple Textboxes - Respondents type in multiple, single-line text responses (i.e. list of single-input text responses).

Confidential © 2023 Redistribution is not permitted without written permission from iMotions

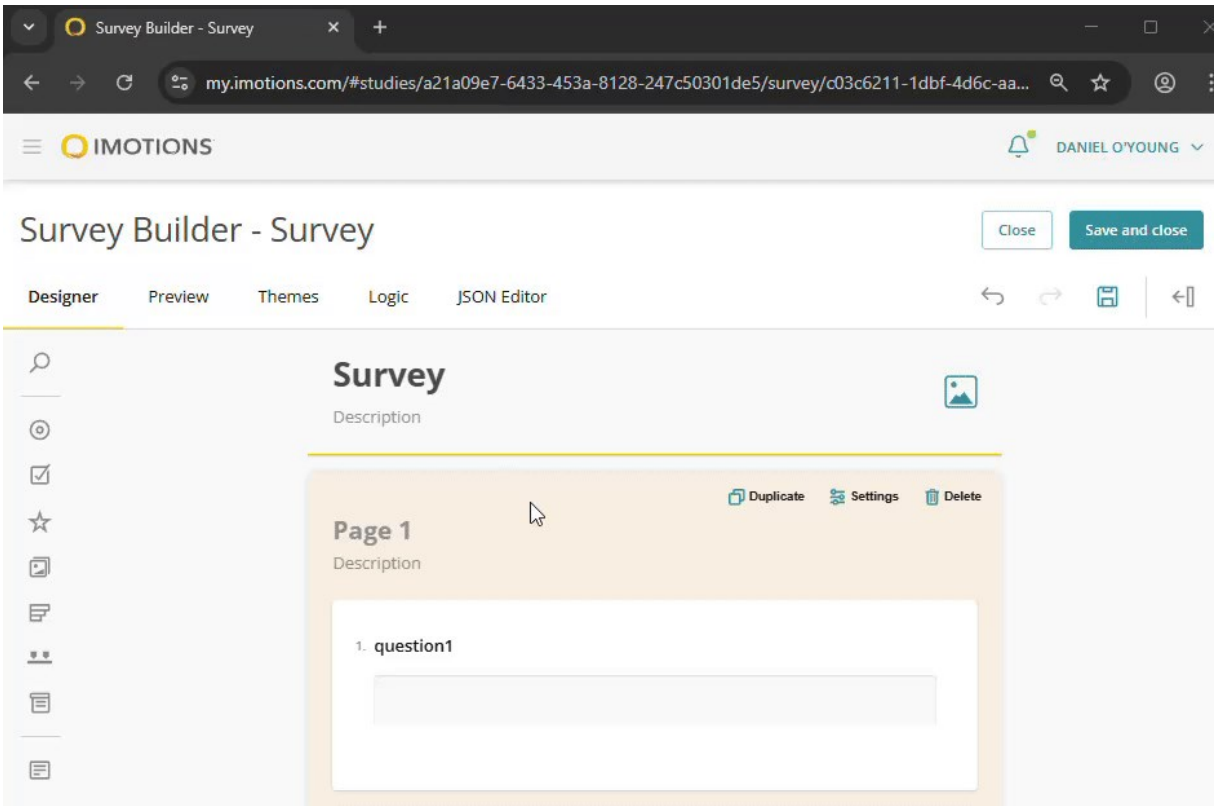

Response Matrix question types:

- Single-Select Matrix - Respondents select one response in each row from a matrix/grid of response options (radio buttons).
- Multiple-Select Matrix - Response select one response from a list of responses presented in a matrix/grid of response prompts.

Saving your iMotions Online Survey

Once the Survey is created in the Designer, you can save the Survey stimulus to your study.

1. Click Save and close to save your Survey stimulus.
2. To return to the Survey Builder and continue editing - select Survey stimulus and click Edit survey.
3. Note: You can only edit stimuli for a study that has not started data collection and does not contain respondents. New edits can only be made by creating a new study where editing is available.

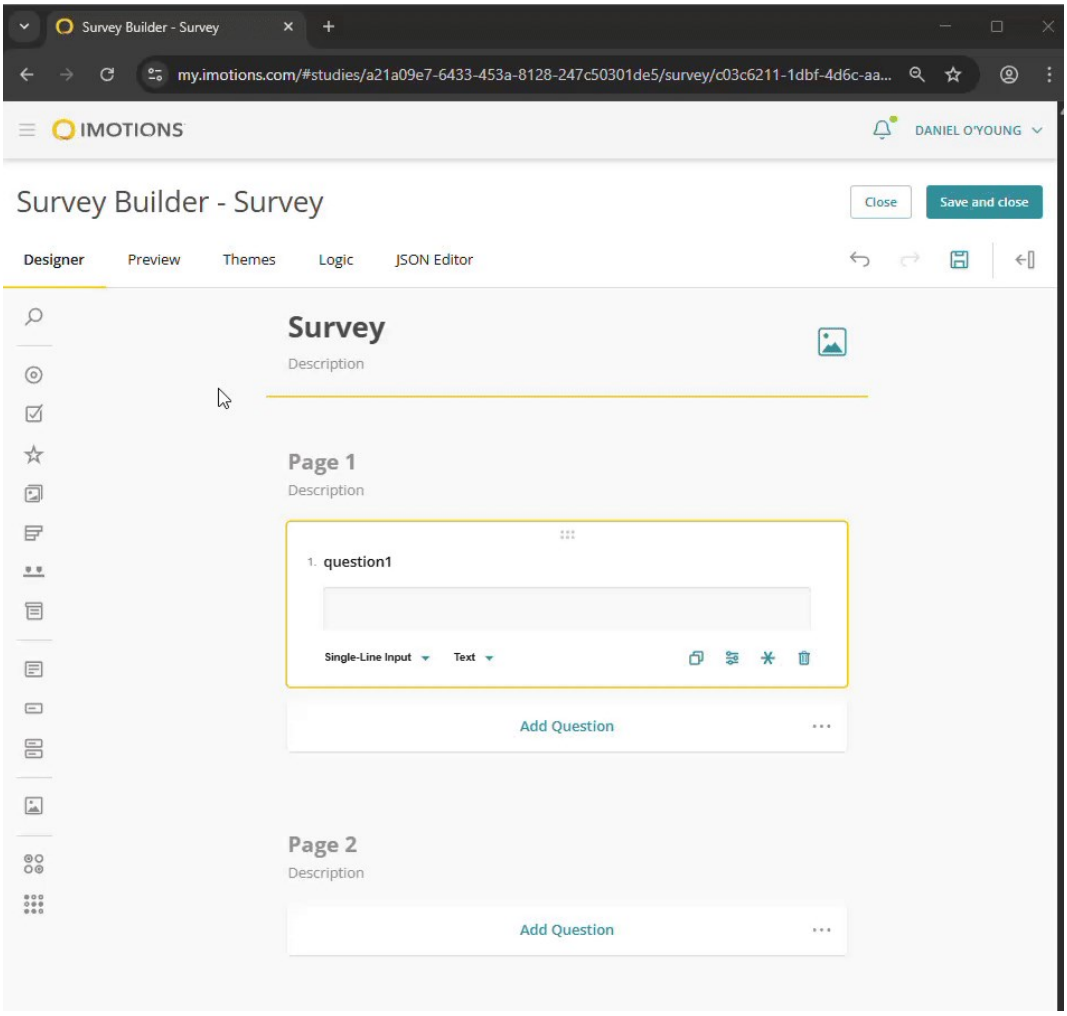

Survey Preview Tab

Confidential © 2023 Redistribution is not permitted without written permission from iMotions

Once the Survey is created in the Designer, you can view the survey in the Preview tab.

The Preview will display the survey according to the Survey Elements and settings that are currently stored.

1. Create a survey with at least one survey element (i.e. question or image) in the Survey Builder - Designer.
2. Click on the Survey Builder - Preview tab.
3. Confirm survey and workflow appears as expected.
4. Continue editing survey as needed.
5. When ready, click Save and close to save the survey to the study.

Survey Builder - Preview, Themes, Logic, and JSON Editor

Other Survey Builder Tabs

Confidential © 2023 Redistribution is not permitted without written permission from iMotions

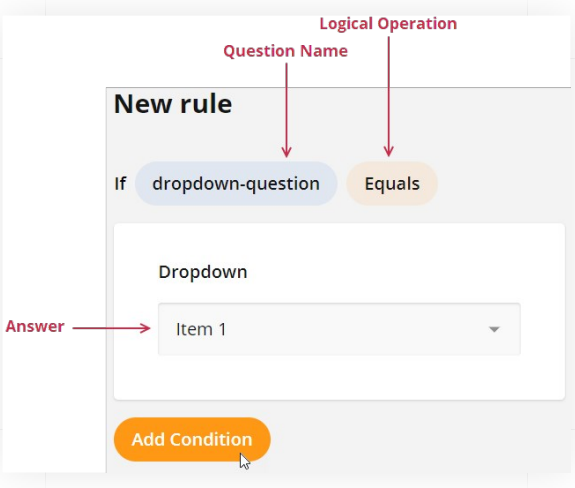

The Survey Builder contains five sections/tabs that can be selected. The Designer is always required and the Preview is generally required. The Themes, Logic, and JSON Editor tabs provide optional settings and features.

1. Designer (Primary Survey Builder tab) - Add and edit survey questions
2. Preview - View survey that is currently loaded in the Survey Builder.
3. Themes - Optional visual/display settings for the survey (General, Header, Background, Appearance)
4. Logic - Optional 'rules' that control survey logic (e.g. order based on response).
5. JSON Editor - View and edit survey in JSON format (e.g. for batch edits or copying survey).

Logic Tab

The Logic tab displays Rules that will be control the survey flow based on Respondent inputs, i.e. responses to the survey.

More specifically, Rules will perform the selected Action according to the defined Condition(s): Question/Response and Logical Operation.

Adding Logic Rules

Click Add New Rule at the bottom of the Logic tab to display editors that allow you to specify conditions and select actions to perform when these conditions are met.

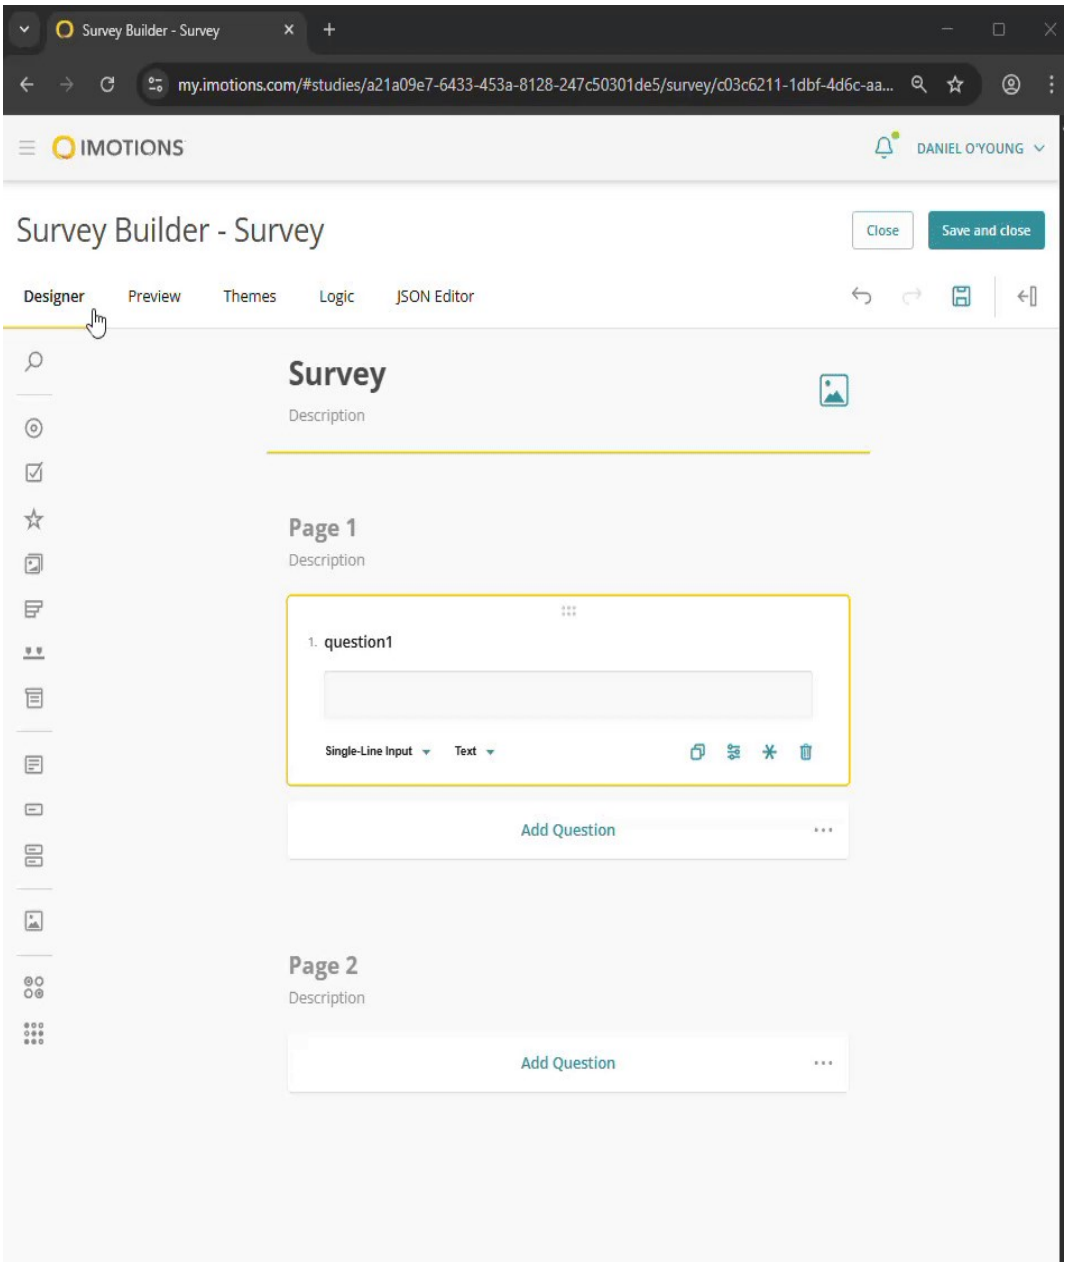

1. Click Add New Rule or select an existing rule.
2. Select Question from list where the rule/logic will apply. Note: Logic options vary by question type.

Confidential © 2023 Redistribution is not permitted without written permission from iMotions

3. Select Logical Operation (‘If’ statement) - Select a logical operation from the drop-down menu to the right of the Question, i.e. ‘Equals’, ‘Greater than’, etc.
4. Specify the Answer where the Rule. Some logical operations do not need an answer (for example, Empty or Not empty).
5. Add Additional Condition(s) as needed - If the rule needs more than one condition, click the Add Condition button, i.e. ‘And’/’Or’ logical operations involving other conditions.
6. Specify Action (‘Then’ clause) - Select one of the following actions from the drop-down menu.
7. Click on any Rule to edit Logic, as needed.
8. Click Done to save your changes.

Alternatively, click Manual Entry to add and edit rules via text editor. In other words, Rules and Conditions are converted between the Logic tab (graphical user interface) and Manual Entry (text/code for ‘logical expressions’).

Adding Survey Logic

Action Menu Options

- Show (Hide) page - Makes the selected page visible. If you want to hide the page, invert the logic of your condition.
- Enable (disable) page - Makes the selected page editable. If you want to make the page read-only, invert the logic of your condition.
- Show (Hide) question - Makes the selected question visible. If you want to hide the question, invert the logic of your condition.
- Enable (disable) question - Makes the selected question editable. If you want to make the question read-only, invert the logic of your condition.

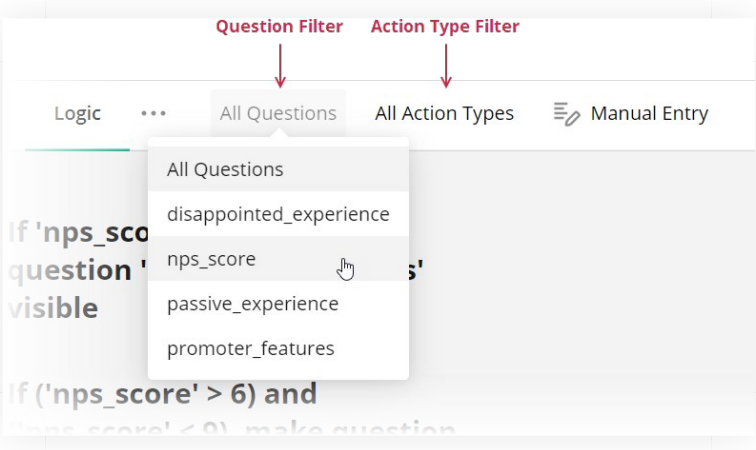

Confidential © 2023 Redistribution is not permitted without written permission from iMotions

- Make question required - Requires an answer for the selected question.
- Complete survey - Completes the survey, i.e. ends survey.
- Set answer - Sets a specified answer to the selected question.
- Copy answer - Copies the answer from the selected question to a target question.
- Skip to question - Navigate the survey to the selected question.
- Run expression - Runs a custom expression on the selected question.
- Set the "Survey Complete" page markup - Specifies custom HTML markup for the Survey Complete page.

Rule Filters

To search through rules that have been created in the Survey:

- Use the Question Filter to find question associated with existing/created rules.
- Use the Action Types Filter to find action types with existing/created rules.

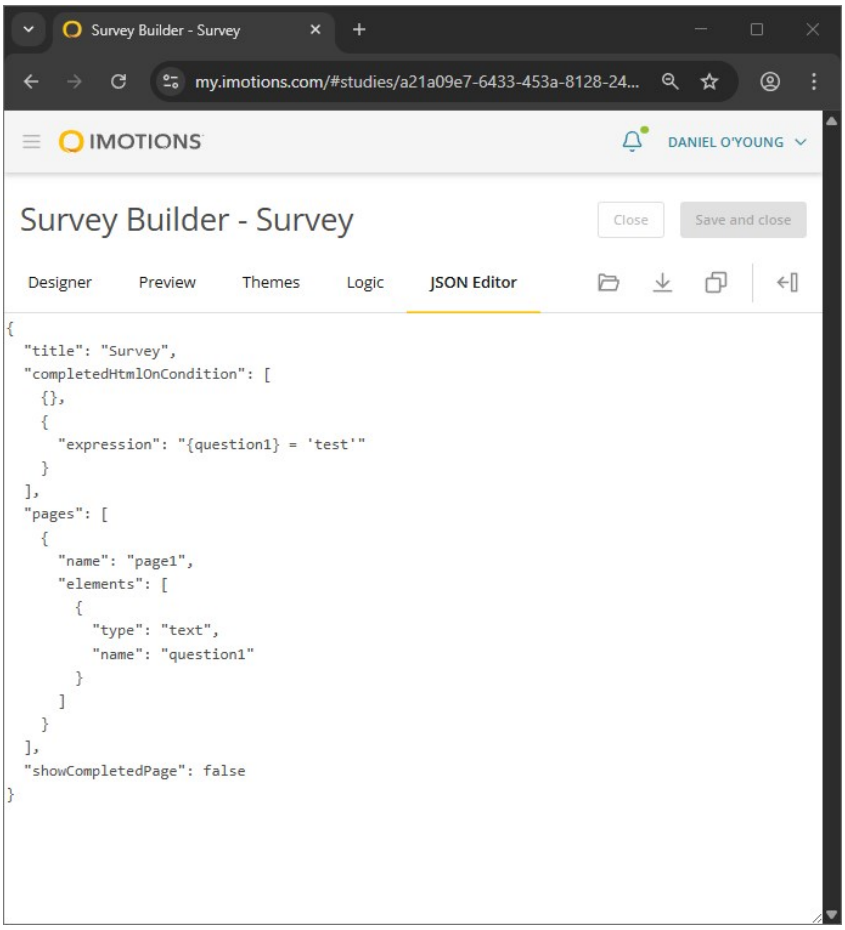

JSON Editor tab

The JSON Editor tab enables you to view and edit your survey in JSON format (text) - converted from the Designer (UI) and survey elements, settings, etc.

- Knowledge of ‘JSON format’ is required for editing. In most cases, you do not need to modify the JSON object on this tab.
- The JSON Editor and text format/functions can facilitate use of the Survey Builder - e.g. copy-pasting surveys or batch text edits.

Copying Surveys with JSON Editor

1. Create or select a ‘template’ Survey Stimulus that will be copied.
2. Navigate to the Survey Builder - JSON Editor.
3. Select and copy text from JSON Editor for the Survey (or Survey Elements).
4. Close Survey Builder (save changes as needed) and return to the Study Builder.
5. Create or Select a ‘destination’ Survey Stimulus.
6. Click Edit survey to open Survey Builder.
7. Navigate to the JSON Editor.
8. Paste text into JSON Editor with Survey (or Survey Elements) - from ‘template’ to ‘destination’ survey.
9. Edit as needed.
10. Click Save and close when finished editing.
